 Chemistry Model Paper X 2023 & 2024 (explained solution)

 File processed successfully! You can now grade your essay.

so this is where my main concern is. The rubrics and grading MUST be according to very specific rubrics for all 3 types 1. EE 2. TAK Essay 3. ~~DK~~ Exhibition.

I have mentioned

this several times

but you have not acknowledged my concerns.

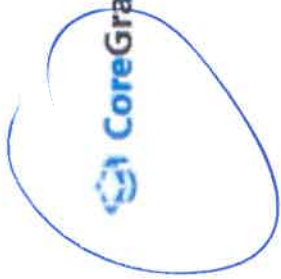

This is not correct as it is (not even close)

and must be corrected.

This is the most important and crucial part of the user experience. I have very specific outcomes so when can we sort this out? we must get this part correct.

Overall Score		3.8/10
Detailed Feedback		
This essay demonstrates strong organizational skills and clear argumentation.		
The introduction effectively establishes the thesis, and each paragraph contributes to developing the central argument.		
The writing is generally clear and concise, with only minor grammatical errors.		
Sentence structure is varied and appropriate, enhancing the overall readability of the essay.		
While the critical analysis shows good understanding of the subject matter, some claims would benefit from more substantial evidence.		
Consider incorporating more specific examples or data to strengthen your arguments.		
The conclusion effectively summarizes the main points but could be more impactful by including broader implications of your argument.		
Recommendations		
Content & Organization	Grammar & Mechanics	
Consider reorganizing the third paragraph to more clearly support your thesis statement.	Strengthen your argument by including more specific examples and source citations.
